For over 90 years, Windhager have been renowned for innovative technical solutions, making heating convenient, safe and cost-effective. Strong demand for our products has allowed us to grow constantly and develop numerous innovations in the heating market. We are now one of Europe's leading manufacturers of boilers for renewable energies and have suitable heating systems for every fuel and solar energy.

Award-winning "made in Austria" quality

The secret to our success? First-class products which satisfy the most demanding requirements and deliver durability and reliability. We produce our boilers to a strict criteria and use only high-quality materials. Our products are only manufactured in Austria, at our company headquarters in Seekirchen, near Salzburg. Independent test institutes regularly recognise our premium quality.

We always focus on the needs of our customers. We don't deliver run-of-the-mill solutions, but instead a heating system tailored to your needs.

4

RELIABLE AND EFFICIENT – THAT'S GUARANTEED

Windhager have developed the LogWIN Premium Touch for an environmentally friendly, economical and efficient way of heating with split logs. The wood gasification boiler ignites fully automatically (optional) – either immediately if heat is required, or at a time you specify. The resistant, stainless steel combustion chamber makes the boiler resistant to acids produced during the gasification of wood and provides permanent protection against corrosion. The combustion chamber is exceptionally robust and therefore able to withstand enormous thermal and mechanical forces. Its visual and practical accumulator load wizard shows whether there is still sufficient heat in the accumulator or whether reheating is needed.

LogWIN Premium Compact

13 10/50 kW

+ NO OTHER BOILER IS AS CONVENIENT

Efficient and clean

With the step-loading function, temperatures of up to 80 °C are transported to your heat accumulator in a controlled manner. With its LambdaTherm regulation system, which automatically adapts output to your heating requirements, the LogWIN Premium consistently burns your wood efficiently and produces low emissions. This innovative combustion control system ensures that embers last longer ensuring that the boiler remains ready for operation. You can remove the accumulated ash quickly, cleanly and simply via the attachable ash tray.

Largest filling chamber in its class

No other wood gasification boiler can heat your home as conveniently as the LogWIN Premium Touch. The filling chamber of this innovative boiler has an above-average capacity and can hold around 64 kilogrammes of beech wood. In comparison to other wood gasification boilers on the market you have to replenish it up to 100 times less frequently per year, saving you time you can spend on more important things!

Optimum accumulator
heat stratification
utilising
steploading function

Convenient heating
surface cleaning system
surface cleaning

Automatic ignition
(optional)

Attachable ash tray for simple
and clean ash removal

Resistant combustion chamber

The patented combustion chamber is made of ceramic-fire clay bricks that can withstand extremely high temperatures. Other wood gasification boilers consider the combustion chamber as a wearing part, but Windhager provides a five-year full guarantee for it.

**Adjustable flue connection for flexibility**

The optional, adjustable flue connection provides a flexible solution for tight spaces as the flue connection can be rotated 180°.

+ PREMIUM QUALITY FOR YOU TO ENJOY

Durable stainless steel chamber

The internal combustion chamber of the LogWIN Premium Touch is made of high-quality stainless steel. This makes it particularly robust and exceptionally long lasting. You will benefit from the material warranty on the filling chamber for up to ten years.

+ THE FUEL WITH A FUTURE

11

Gleichen Text verwenden nicht: There are numerous good reasons to heat your building with logs: This wood fuel is CO₂-neutral, it is locally produced and is independent of oil and gas price fluctuations.

Sustainable fuel

Locally sourced fuel supply

Independence from fossil fuels

+ COMBINING AND OPERATING OUR PRODUCTS

Windhager is a one-stop shop for innovative heating solutions and perfectly coordinated heating components. Thanks to Windhager system technology you can easily combine all of our different products. Add our innovative heating control to your LogWIN Premium Touch and integrate an extra solar system or more heat generators with ease. The my-Comfort app makes operating your heating system easier than ever – no matter whether you are at home or not.

The InfoWIN Touch from Windhager makes light work of controlling your heating system. The high-quality glass screen on the LogWIN Premium Touch allows the display to be touched and swiped making the interaction with the boiler simple and easy. The InfoWIN Touch is also available as a control unit for living rooms and includes the web server for remote access via the myComfort app.

- High-resolution graphics and brilliant colours
- Durable, scratch-resistant glass display
- Intuitive touch and swipe operation
